POND
AN
ALMANACK
for the Year of our
LORD GOD
1684.

Being the Bissextile or Leap-year,
and from the Worlds Creation at the
Spring 5687 years Compleat.

Amplified with many good things both
for pleasure and profit: and fitted for
the Meridian of Saffron-Walden in Essex,
where the Pole is elevated 52 degrees and
6 minutes above the Horizon.

And may serve indifferently for any other
place of this Kingdom.

C A M B R I D G E,
Printed by John Hayes, Printer to the
University, 1684.

Pond 1684.

The vulgar Notes and moveable Feasts for this
Year 1684. in both Accounts, viz.

Julien or Englisb.	13	The Golden Number	13	Gregorian or Foreign.
	13	Cycle of the Sun.	13	
	23	The Epact	13	
	Febr.	The Dominical Letters	13 A	
March	10	Shrove-sunday	Febr. 13	
May	30	Salter-day	April 2	
May	8	Ascension-day	May 11	
May	18	Wait-sunday	May 21	
May	25	Trinity Sunday	May 28	
Novemb. 30		Advent-sunday	Decemb. 3	

The Suns entrance into the four Cardinal Signs.

HE enters *Aries*, March the 9 day, at 2 afternoon, at which time the Figure of the Heavens will appear as followeth, viz. 18 degrees of $\textcircled{\text{A}}$ Ascending in the East, 18 degr. of $\textcircled{\text{M}}$ in the West, 3 degr. of $\textcircled{\text{M}}$ on the Cusp of the 4 house, and 3 degrees of $\textcircled{\text{S}}$ culminating. $\textcircled{\text{H}}$ being an enemy to Life is in the first house, or house of Life, and $\textcircled{\text{S}}$ approaches to the 10 house or *culmen caeli*, being the house of Honour.

He enters $\textcircled{\text{G}}$ June the 10, 37 m. past 4 afternoon.

He enters $\textcircled{\text{C}}$ Septem. 12, 44 min. past 8 in the morn.

He enters $\textcircled{\text{V}}$ Decem. 10, 15 min. past 8 at night.

Marriage comes in on the 13 day of January, and at Septuagesima Sunday it is out again untill Low-sunday; at which time it comes in again, and goes not out till Rogation-sunday: thence it is forbidden untill Trinity-sund. from whence it is unforbidden untill Advent-sunday: but then it goes out, and comes not in again untill the 13 day of January next following.

The

The beginning and ending of the Terms.

Hilary Term begins January 23, ends February 12.

Easter Term begins April 16, ends May 12.

Trinity Term begins May 30, ends June 18.

Michaelmas Term begins Octob. 23, ends Novem 28.

A Table shewing how many years Purchase a Lease or Annuity to endure for any number of years under 30, is worth presently, at interest upon interest, at six in the hundred, and shewing also how to discount any Lease in being, and the true value of the Reversion after any number of years.

Years of a Lease.	Years.	Months.	Dec. parts.	Years of a Lease.	Years.	Months.	Dec. parts.
1	0	11	0	16	0	1	3
2	1	9	9	17	10	5	8
3	2	8	1	18	10	9	9
4	3	5	9	19	11	1	3
5	4	2	5	20	11	5	7
6	4	11	0	21	11	9	3
7	5	7	0	22	12	0	5
8	6	2	5	23	12	3	6
9	6	9	6	24	12	6	6
10	7	4	3	25	12	9	4
11	7	10	7	26	13	0	0
12	8	4	6	27	13	2	5
13	8	10	3	28	13	4	9
14	9	3	6	29	13	7	1
15	9	8	5	30	13	9	2

The use and Explanation of this Table.

The first Column at the left hand sheweth the years of a Lease, or Annuity, and right against each year are the years, months, and decimal parts of a months purchase that such a Lease or Annuity is worth.

Example.

Suppose a Lease or Annuity to continue 18 years, and you would know how many years purchase it is worth in ready mony, look in the Column of the years of a Lease, for 18 years, and against the same you shall find 10, 9, 9, which shews such a Lease to be worth 10 years,

9 months, and 9 ten parts of a months purchase. So that the yearly rent being 12 pound, the value will be thus

10 times 12 is 120 0 0
12¹ in 9 mon. is 9 0 0
in 9 parts is 0 18 0

But if you buy the Reversion of a Lease now, as suppose a Lease of 20 years continuance, and you commence not till 5 years be past, in this and such like cases, look for the present worth of the Lease, as this of 20 years, which will be found worth 11 years, 3 months, 7 tenths of a months purchase, then look the present worth of a Lease of 5 years, which will be found worth 4 years, 2 months, 5 tenths, take this out of 11 3 7 and there remains 7, 3, 1, which are 7 years, 3 months, 2 tenths of a months purchase 3 and so much is the Reversion of the Lease of 20 years, after 5 years worth be expired.

January hath xxxi days.

New moon the 6 day, 35 min. past 5 at night.

First quarter the 14 day, 26 min. past 6 at night.

Full moon the 22 day, 5 min. past 8 beforenoon.

Last quarter the 28 day, 43 min. past 9 at night.

Now is it time to trench the Ground, and to make it ready for the Spring: to prepare Soil, and use it where it is required, dig Borders, plant Quick-setts, and transplant Fruit Trees, if not finished, set Vines, and begin to prune the old; prune especially the branches of old planted Fruit Trees about the decrease of the Moon, but prune not the newly planted till the sap begins to stir, cleanse Trees of Moss, gather Cyons for Graffs, and graff them, turn up your Bee-hives, &c.

January 1684.

In order to an Explanation of the moveable Feasts, we will begin at New-years-day, being the first day of the Year, and also the day of the Circumcision of our Lord, between which and Epiphany, (so called from the appearance of the Star to the Wise Men) if any Sunday intervenes, it has no name assigned; but the Sundays following Epiphany, are noted in order, as the 1, the 2, &c. after Epiphany, which are sometimes more, sometimes fewer, as Easter falls high or low; for they must be ended and give place to *Septuagesima*, which is so called, because it is always 70 days before Easter.

February hath xxix days.

New moon the 5 day, 17 min. past 10 beforenoon,
 First quarter the 13 day, 52 min. past 1 afternoon.
 Full moon the 20 day, 50 min. past 4 afternoon.
 Last quarter 27 day, 31 min. past 7 in the morning.

Continue yet to prune Fruit Trees, and Vines, and bind, plash, nail and dress without danger of Frost, the most delicate Wall-Fruit: remove Graffs of former years grafting, Cut and Lay Quick-setts, plant Vines as yet, and Hops, &c. Set all sorts of Kernells and Stony-seeds, also low Beans, Pease, Rounsevals, Curr-fallet, Marigold, Aniseed, Radish, Parsneps, Carrats, &c. Plant Potatoes in your worst ground, plant Cole-Flowers; half open the passages for your Bees, &c.

24 ther soon
25 follows, but
26 not very cold
27 toward the
28 end, yet
29 windy.

February 1684.

The next Sunday is called *Sexagesima*, although it is not altogether 60 days before *Easter*, the next is *Quinquagesima*, which also wants one day to compleat 50 days before *Easter*; it is commonly called *Shrove-sunday*; and also *Dominica Bacchanaliorum* the Sunday of Revellers or *Bacchanalians*. The Wednesday in this Week is *Ash-wednesday*, or *Dies Cinerum*; so called, because on this day they use to bespinkle their heads with Ashes: the next Sunday called *Quadragesima*, being the first Sunday in *Lent*, is also called *Invocavit* because then is sung that of the Psalmist, *Invocavit me, he called upon me, &c.*

March hath xxxi days.

New moon the 6 day, 26 min. past 3 in the morn.
 First quarter the 14 day, 14 min. past 6 in the morn.
 Full moon the 21 day, 1 min. past 2 in the morning.
 Last quarter the 27 day, 30 min. past 7 at night.

March 1684.

The second Sunday in Lent is called *Reminiscere*, from *Psal. 25.* v. 6. Remember o Lord, &c.

The third is called *Oculi*, from the 15 verse of the same *Psalm*, *Oculi mei semper ad Dominum*.

The fourth *Laetare*, from *Isa. 66.* 10. *Laetare cum Ierusalem* Rejoyce thou with *Ierusalem*: some call it *Dominica de Rosa*, because then the Pope holds a Golden Rose in his hand at Church before all the People, it is also called *Dominica de Panibus*, because the miracle of the five Loaves in the Gospel is explained on this day: with us it is generally termed *Mid-Lent-Sunday*.

April hath xxx days.

New moon the 4 day, 2 min. past 9 at night.

First quarter the 12 day, 9 min. past 7 at night.

Full moon the 19 day, 56 min. past 9 in the morning.

Last quarter the 26 day, 11 min. past 9 in the morn.

Sow Sweet Marjoram, Hyssop, Basil, Thyme, Winter Savory, Scurvy-grass, and all fine and tender Seeds, as also Lettice, Purflan, Cole-Flower, Radish, &c. Plant Artichoak Slips; sow Turneps, and set French-Beans, you may yet also slip Lavender, Thyme, Peniroyal, Sage, &c. towards the middle of the Month plant forth your Melons and Cucumbers. Open now your Bee-Hives, for now they hatch; look carefully to them and prepare your Hives. Gather up Worms and Snails on evenings.

April 1684.

The fifth Sunday in Lent is called *Judica*, from Psal. 43. v. 1. Judge me, &c. the next is *Palm-Sunday*; so called from the Palm-branches which the People strewed before our Saviour entring into *Jerusalem*: 'tis likewise called *Domina Magna*, for the great and ineffable Good wrought in the Week following for the Faithfull, for the Friday next is *Good-Friday*, as the day whereon our Blessed Saviour suffered for the sins of Mankind: then comes *Easter-Sunday*, celebrated in memory of our Saviours Resurrection: after this follows the *Quinquagesimal* or space of 50, days inclusively between *Easter* and *Whit-sunday*; all which the *Ancient Christians* kept as a *Festival* containing 6 Sundays.

May hath xxxi days

New moon the 4 day, 52 min. past noon.

First quarter the 12 day, 4 min. past 4 in the morn.

Full moon the 18 day, 35 min. past 5 afternoon.

Last quarter the 26 day, 33 min. past 12 in the morn.

May 1684.

The first Sunday after Easter called *Lov-Sunday*, was termed *Quasi modo Geniti*, from the first of Pet. 2. 2. as new born babes, &c. 'tis also called *Dominica in albis*, because those that were baptized at Easter, used to go in White Garments all the week, which this day at night they left off: the second Sunday is called *Misericordia*, from Psal. 32. 5. the third *Jubilate*, from Psalm 65. 1. the fourth *Canate*, from Psalm 97. 1. the fifth is called *Rogation-Sunday*, and the week following *Rogation-week*, because then they made their Processions into the Fields, and made their Prayers and Requests or *Rogations* to God Publickly.

June hath xxx days.

New moon the 3 day, 43 min. past 2 in the morn.
First quarter the 10 day, 51 min. past 9 beforenoon.
Full moon the 17 day, 26 min. past 2 in the morning.
Last quarter the 24 day, 17 min. past 5 afternoon.

Yet sow Lettuce, Chervil, Radish, &c. to have young and tender sallering: about the midst of this Month inoculate Peaches, Apricots, Cherries, Plums, Apples, &c. cleanse Vines of exuberant branches and tendrels by cropping, not cutting, and stop the second joyn't immediately before the Fruit. Gather Herbs to keep dry in the full Moon; and let them be dried in the shade, not in the Sun. Distil Aromatick Plants. Look to your Bees for Swarms and Casts; and begin to destroy Insects with hoofs, &c.

June 1684.

The Thursday in Rogation week is *Holy Thursday*, kept in memory of our Saviour's Ascension into Heaven. The last Sunday is called *Exaudi*, from Psalm 27, Hear, O Lord, &c. then succeeds the grand Feast, called by us *Whitsunide*, because antiently People appeared in such coloured (that is white) Garments, but in Greek it is called *Pentecost*, which was observed by the Jews in memory of the Promulgation of the Law on Mount *Sinai*, being 50 days after their Pass-over, till called by us *Pascha*, viz. *Easter*, in analogy to which Christians observe the Feast of *Pentecost* in memory of the Gift of the Holy Ghost, and Tongues conferr'd upon the Apostles: The next is *Trinity Sunday*, and from thence the Sundays are reckoned in order to *Advent*.

July hath xxxi days.

New moon the 2 day, 27 min. past 2 afternoon.

First quarter the 9 day, 38 min. past 1 afternoon.

Full moon the 16 day, 32 min. past noon.

Last quarter the 24 day, 53 min. past 9 beforenoon.

Yet sow Lettuce, Radish, &c. to have tender Salleting; sow also later Pease to be ripe six weeks after Michaelmas. Water young planted Trees, and Layers, &c. Rerunne Apricots and Peaches, saving as many of the young likeliest Shoots as are well placed; for the now bearers commonly perish, the new ones succeeding. Purge your Wall-Fruit of superfluous Leaves which hinder from the Sun, but not too much. Begin to strengthen the entrance of your Bees, and help them to kill their Drones.

July 1684.

The Sun has now passed his *Aphelion*, or greatest distance from the Earth, it being accounted to be when he is in about the 6 degree of $\text{\textcircled{G}}$, being then 4588960 miles from the Earth; Whereas in his *Perigeeon*, that is in *Vp*, in *December*, he is not above 4272480 miles from the Earth, so that the quantity of his *Elongation*, or space between one and the other is 316480 miles, and so much he is nearer the Earth in our *Winter* than in *Summer*, although his heat is more weak as to us when he is nearest, but that is to be attributed to the obliquity of his *Rays*.

August hath xxxi days.

New moon the 1 day, 8 min. past 2 in the morning.
 First quarter the 7 day, 36 min. past 7 at night.
 Full moon the 15 day, 53 min. past 12 in the morning.
 Last quarter the 23 day, 5 min. past 3 in the morn.
 New moon the 30 day, 21 min. past 10 in the morn.

August 1684.

Mars being the lowest of the Superior Planets is distant from the Earth 7635292 miles; but when he is Achronically opposite to the Sun, that is when he is in the lowest Absis of his Orb, or in his *Perigaeon*, he is 1690280 miles nearer than when he is in his *Apogaeon*, and therefore no wonder if he cause a great intension of heat in Summer, or remission of cold in Winter, when he is at his nearest distance to us, and that is when he is Orientally opposite to the Sun, just 6 Signs distant, which will not be this Year, although he be Oriental from July to the end of the Year.

September hath xxx days.

First quarter the 6 day, 21 min. past 12 in the morn.
 Full moon the 13 day, at 8 at night.
 Last quarter the 21 day, 41 min. past 7 at night.
 New moon the 28 day, 34 min. past 7 at night.

September 1684.

The Ember Weeks
being of great Antiquity, are
four in number, and therefore
called by the ancient Fathers
Quatuor anni tempora, they contain
the Wednesday, Friday, and Saturday
next after AshWednesday, Whitunday, Holy-Cross, and S.
Lucy's day: they were at first
ordained for quarterly Seasons of
Devotion, wherein (as the first
Fruits of every Season) the an-
cient Christians put up their Prayers
and Supplications to Almighty
God, that thereby the whole year
might be blessed.

October hath xxxi days.

First quarter the 5 day, 21 min. past 9 beforenoon.
 Full moon the 13 day, 6 min. past 9 beforenoon.
 Last quarter the 21 day, 1 min. past 11 beforenoon.

Continue your Setting and Transplanting of Trees, and bare old roots. Plant young Trees, Standard or Mural. Furnish your Nursery with Stocks to Graft on the following year. Sow and set early Beans and Peas till Shrove-tide; and now lay up in your Cellars, for spending and seed, to be transplanted at Spring, Carrots, Parsneps, Turneps, Cabbage, Caully-Flowers, &c. Cut off the tops of Asparagus, and cover it with long Dung. Take up your Potatoes for Winter spending.

December 1684.

The second from his coming to
Judge the World at the last day.

The third from his coming to
the Ministry, whose forerunner
was John.

The fourth, for a Preparation to
the coming of Christ.

*Now the Year hath turn'd his Course
about,
And fully worn his weary hours out.*

Pond 1684.

A Regal Table in a more exact manner.

The Year, Month, and Day, (accounting the Year to be gins Jan. 1.) whereon every K. and Q. of Eng. since the Conq. began their reign.	The number of Years, Moneths, & Days, that eve- ry K. & Q. reigns.	The num. of y. expired in this y. since they began to reign: as also 12 da. to a moon.

The use of this Table in Example.

King Henry 8 began his Reign in the year of Christ 1509, April 22. He Reigned 37 years, 7.0 moneths, and 2 days. It is since he began his Reign 175 years compleat the 22 of April this year 1684. Now to know the time since the end of his Reign, before his name standing on the right hand, you shall there find 137 years since he died, January 28. And so of the rest.

Pond 1684.

The Explanation and use of the foregoing
Table, with some observations of *England*.

The Table consisting of several Columns, is plain and easie; in the first column towards the left hand, is a Catalogue of all the Shires in *England* and *Wales*, right against each of which, under their proper Titles, are the number of Parliament Men, Hundreds, Market-Towns and Parishes cotainned in the same, as also the Length, Breadth, and Circumference of the Shire, with the name of the Chief Town thereof, and its Distance and Situation from *Cambridge*.

As for Example,

I desire to know all the forementioned things, in or belonging to *Norfolk*, I look for *Norf.* in the first column (the Shires being in an Alphabetical order) and right against the same I find, 12 Parliament Men, 31 Hundr. 28 Market-Towns, 660 Parish, its length 50 mil, breadth 30, circumference 240, the chief Town *Norwich*, its distance from *Cambridge* 49 miles, and its situation from thence North East, signified by N. E. thus in like manner is to be done for any other Place.

England, being the Chiefeſt and pleaſanteſt part of *Great Britain* is trebly diſdivided, 1 into fix Circuits deſti-
nated to the Itinerarie Judges, 2 into 22 Epifco-
pafles, 3 into 40 Shires; the Shires were firſt made by
King *Alfred*, for the eaſier and ſpeedy administration of
Juſtice. This King alſo diſdivided his Subjects into teſs, or Tythingſ, every of which ſeverally, ſhould give bond
for the good behaviour of each other; teſt of the nigh-
eſt Tythingſ made the Leſſer diſdiviſion which we call
Hundreds, which name cannot be deſived from the num-
ber of Villages, none of our Hundreds being ſo large:
theſe Hundreds are called Wards in *Cumberland*, *Westmor-
land*, *Durham*, *Noribumbeſland*: in every Hundred there's

a Coastable called the Constable of the Hundred, who receives Warrants from the Sheriffs, or Justices, and dispatches them to the Coastables of each Town and Village in his Hundred, for the effecting of publick busineses. To enumerate the plenties and ornaments of *England* requires more room than here is allotted, therefore it may suffice to express some of her Excellencies in these verses. *viz.*

*England is stor'd with Mountains, Bridges, Wooll,
With Churches, Rivers, Women beautifull.*

Of the Eclipses this year.

There happens four Eclipses this year, two of the Sun, and two of the Moon, three of them will be visible to us in *England*, *viz.* two of the Moon, and one of the Sun.

The first will be of the Sun on the 6 day of *January*, at 6 at night, in 26 degrees of $\text{\textcircled{V}}$, it will be a great Eclipse but to us invisible, but in *America*, the *West Indies*, &c. it may be seen.

The second is a small Eclipse of the Moon, the 17 day of *June*, about 3 in the morning, in 6 degrees of $\text{\textcircled{V}}$, and may be seen by us.

The third is a great Eclipse of the Sun, happening the 2 day of *July*, about 3 afternoon, it will be visible to us, and we may see two thirds of the Sun's body obscured.

The fourth will be a great Eclipse of the Moon, visible also to us on the 11 day of *December*, at 11 at night, it happens in 1 degree of $\text{\textcircled{S}}$, and will be almost total.

A famous Conjunction of the two Infortunes *Saturn* and *Mars* happens the 3 day of *October*, in 13 degrees of $\text{\textcircled{V}}$, which is of treacherous import.

Prognosticks of Pestilential and unwholesom Years.

IT is observed by the Learned, that those Years are Pestilential and unwholesom, when there are great numbers of Frogs, Flies, Locusts, &c. the reason is, because those Creatures being engendred of putrefaction, when they abound, shew a general disposition of the Year, and constitution of the Air, to Diseases of putrefaction: so likewise the same Prognostick holdeth, if you find Worms in Oak Apples; for the constitution of the Air, appeareth more subtilly, in any of these things, than to the sence of Man.

Great and early Heats in the Spring (and namely in *May*) without Winds, portend also pestilent Years: and generally so do years with little Wind or Thunder.

Great Drought also in Summer, continuing till towards the end of *August*, and some gentle Showers upon them, and then some dry weather again; do portend a pestilent Summer the year following: because about the end of *August*, all the sweetnes of the Earth, which goeth into Plants and Trees, is exhaled; (and much more if *August* be dry) so that then nothing can breath forth of the Earth, but a gross Vapor which is apt to corrupt the Air: and that Vapor by the first Showers, if they be gentle, is released, and cometh forth abundantly: therefore they that come abroad soon after those Showers are commonly taken with Sickness. And in *Africk*, no body will stir out of doors after the first Showers; but if the Showers come vehemently, than they rather wash and fill the Earth, than give it leave to breath forth pleasantly. But if dry weather come again, than it fixeth and continueth the corruption of the Air, upon the first Showers begun, and maketh it of ill Influence, even to the next Summer, except a very frosty Winter discharge it, which seldom succeeds.

The lesser Infection of the Small Pox, Purple-Fevers, Agues, in the Summer precedent, and hovering all Winter, do likewise portend a great Pestilence in the Summer following; for putrefaction doth not rise to its height at once.

A dry *March*, and a dry *May*, portend a wholesom Summer, if there be a showring *April* between: but otherwise it is a sign of a pestilential Year.

Furthermore, because the Air according to its situation doth much alter and change the Constitution of Mans body, and may breed pure and wholesom Bloud, or corrupt and bad Bloud, and malignant Humors. Therefore that you may know what Air is pure and sound, and what Air corrupt and infectious, we will add some Experiments, which the Judicious have observed, whereby you may conjecture how the Air is disposed; and that first,

A sound and pure Air is made hot presently after Sun rising, and is made cold presently after Sun-setting.

Which yieldeth a pleasant smell after Rain, clear and not evaporated, open and lightsom, where the North wind bloweth, and where the East wind bloweth in the morning.

A corrupt and infectious Air, is made by the often blowing of the South, or South-east-wind, or by the South-west, or West in the evening, which ingender Sickneses.

Where the Air is cold long after Sun-rising.

Where the Air is long hot after Sun set.

Where the Air is long close, cloudy, or thick.

Of the Division of the World.

THE World, called by the Greeks Κόσμος, and in Latine *Mundus*, is Geographically divided into 4 parts, viz. *Europe*, *Afia*, *Africa*, and *America*.

POLE 1684.

Europe is bounded on the North with the Northern Ocean, and on the South with the Mediterranean Sea, on the East with the Floud Tanis, and on the West with the Western Ocean, and containeth these Provinces, viz.

Germany.	Spain.	Swedeland.	Hungaria.
Italy.	Denmark.	Moscovia.	Sclavonia.
France.	Norway.	Polonia.	Gracia.

The principal Islands are these, viz.

England.	Ireland.	Gandia.	Sardigna.
Scotland.	Sicilia.	Corfica.	Nigropont.

The greatest Length of this part of the World is 3000 miles, and the Breadth 900 miles.

Asia is bounded on the North with the North Ocean, on the South with the Red Sea, and the Gulfs adjoining, on the East with the East Indian Ocean, and on the West with the Floud Tanis, whose principal Regions are these, viz.

Anatolia.	Arabia.	Chaldea.	China.
Syria.	Media.	Perfia.	India, and the
Palestina.	Affyria.	Parthia.	Islands there-
Armenia.	Mesopotamia.	Tartaria.	of.

This part of the World is more famous than all the World in five Respects, viz. 1. for the Creation of Mankind, 2. for the Birth of our Saviour, 3. for His Miracles, and place of Suffering, 4. for the famous Monarchies of the Babylonians, Affyrians, Medes, and Persians, 5. for that it is the Common Mother of us all, it being the Place from whence innumerable troops of men issued to supply the vacuity of the inhabitable parts of the World.

Africa is bounded on the East with the Red Sea, on the West with the Atlantik Ocean, on the South with the Southern Ocean, and on the North with the Mediterranean Sea.

The Provinces are.

Egypt, Barbaria, Aethiopia, Nubia, Abasines, Monapopg.

The

Page 164.

The Islands are

Madagascar or St Laurence, St Thomas, Insula de Cape verde, Insula de Canaria, Insula de Madera.

America the fourth part of the World was altogether unknown to the Ancients, but by latter Observations is found to be bounded on the East with the *Atlantick Ocean*, on the West with the *West Indian Ocean*, on the North with the *Northern Ocean*, and on the South with the *Magellanick Sea*, consisting of two parts, *viz. Mexicana and Peruana*.

The Provinces of *Mexicana* are

Nova Hispania, Terra Florida, Nova Albion, or New England, California, Norumbega, Nova Francia, Eistoriland.

The chief Islands of *Mexicana* are,
Greenland, Island, Friedstrand.

The Provinces of *Peruana* are,

Brazilia, Tisnada, Caribana, Catagena, Peru, Charas, Chili, Chicha, Patagonos.

The chief Islands of *Peruana* are,

Hispaniola, Cuba, with many others in the West Indies, Insula Margarita, and Meluc Island, Remores, Fava major, Fava minor, Salomonis Insula, all the other Islands in the East Indies.

The Names of the Seas.

Ocean Sea, Narrow Sea, Mediterranean Sea, Mare Major, Mare Caspium, East Indian Sea, Red Sea, Persian Sea, South Sea.

The ancient Cosmographers have also divided the Habitable part of the Earth, that lieth between the Equinoctial and North Pole into 7 Climates, to which they have given names according to the names of the place through which the midle of them passe, as the 1. *Dia Meroes*, 2. *Dia Syenes*, 3. *Dia Alexandria*, 4. *Dia Rhodes*, 5. *Dia Rhomes*, 6. *Dia Boristhena*, &c.
